

Tomás Leote Falcão

Lisbon, Portugal | (+351) 924701617 | tomas.leote@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

Professional Summary

Software Developer with hands-on experience in full-stack development, specializing in modern technologies including React, Angular, Vue, .NET, Node.js, and OutSystems. Proficient across the entire development lifecycle from front-end UI implementation to back-end REST API integration, with expertise in JavaScript, Python, and SQL. Demonstrated ability to rapidly adopt new technologies and frameworks, having successfully delivered solutions across healthcare, SaaS, and enterprise environments. Strong foundation in Agile methodologies, cross-functional collaboration, and scalable application development. Currently, I work as a Junior Software Developer at Minsait, where I am part of the Low Code & Digital Innovation team.

Education

- **BSc Computing Science, Rijksuniversiteit Groningen:** September 2020 - April 2025
- **Bachillerato Instituto Espanhol Lisboa:** Primary and Secondary education, September 2003 - June 2020
- **AFS Program:** One-year intercultural exchange in the Netherlands, September 2018 - June 2019

Work Experience

Junior Software Developer, Minsait

Lisbon, Portugal. January 2026 - Present

- Develop and deploy enterprise solutions using OutSystems low-code platform, delivering scalable web applications for diverse client projects
- Collaborate with cross-functional teams throughout the full software development lifecycle in Agile environments
- Continuously expand technical skill set through structured training programs and hands-on project work in low-code development methodologies

Software Developer, Avodah Creatives

Remote (Amsterdam, Netherlands). September 2025 - January 2026

- Led the front-end team in developing the company website from scratch using React and Tailwind CSS, implementing responsive design and modern UI components
- Developing the company's flagship product from the ground up
- Coordinating front-end development efforts and distributing tasks across the development team

Software developer Internship, Hospital Lusíadas

Lisbon, Portugal. September 2024 - December 2024

- Designed, implemented, and tested front-end and Back-End solutions using Vue and .NET frameworks
- Integrated RESTful APIs to connect front-end and back-end services
- Contributed to cross-functional teams, improving efficiency across hospital workflows
- Practiced Agile development and maintained code quality in large-scale environments.

Software development Thesis Internship, Klippa

Groningen, Netherlands. April 2024 - June 2024

- Collaborated with senior engineers to build scalable analytics tools that supported strategic insights into platform usage for business clients and for Klippa DocHorizon SaaS product.
- Implemented Angular, GraphQL, and Highcharts to deliver customizable data visualizations for document processing.
- Focused on scalability, data visualization and user experience for scalable document processing.

Founder, Project Umbra

Groningen, Netherlands. September 2021 - September 2024

- Founded and grew an event-planning business from concept to execution, demonstrating entrepreneurial initiative and business acumen while managing a team of 6 people
- Implemented agile project management techniques to successfully deliver over 20 events with up to 700 attendees
